

Hemex supports start-ups as well as established companies with a wide range of expertise in developing pharmaceutical products and medical devices. Our experts have made successful careers in the pharmaceutical and/or medtech industry and made pivotal contributions to the development and approval of innovative products.

To support the conduct of clinical trials on the Indian subcontinent, our team in Liestal (Switzerland) is currently looking for a

Clinical Research Associate (m/f)

Responsibilities

- Organise and manage multicenter clinical trials for investigational drugs / medical devices / diagnostic tests in order to make an accurate benefit /risk analysis.
- In-house and on-site clinical monitoring throughout the duration of the trial (site selection, site initiation/training visits, routine monitoring visits, close out visits).
- Daily interactions with site staff (investigators, research coordinators, study nurses, ...) in local language, as well as with internal and external stakeholders in German and English.
- Support the study manager with writing clinical trial protocol, trial manuals, Case Report Forms (CRFs), Data Clarification Forms (DCFs), and other documentation.
- Support logistics with supplying study centres with sufficient quantities of study drugs/equipment etc.
- Training clinical trial staff on how to conduct the trials in accordance with GCP standards.

Candidate Profile

- Graduate qualification in nursing, life sciences, dentistry, medical sciences (such as physiology, immunology, medicine, anatomy or pharmacy) with at least 2-4 years clinical practice experience.
- Post-graduate qualifications in clinical research, drug development, epidemiology and public policy.
- Experience of working in a recognized teaching institution involved in clinical research Europe
- Good knowledge of ICH-GCP with proven experience in biostatistics, managing clinical trial sites. Working knowledge of Swiss / EU regulations for conducting clinical trials.
- Good medical and scientific judgement.
- Ability to evaluate, interpret and present scientific data.
- Self-motivated, able to prioritize and plan effectively.
- Attention to detail.
- Good computing / IT skills.
- Excellent numerical, written and verbal communication skills.
- Language skills: Hindi, fluent in English, German Additional languages are a plus.
- Swiss resident (Swiss nationality, C- or B-permit). Able to travel up to 50% to clinical trial sites on the Indian subcontinent and to clients in the US.

Our offer

- Join a highly motivated and skilled team
- Office-based employment in Liestal (Switzerland)
- Competitive remuneration package
- Pleasant working environment in a dynamic organization
- Flexible working hours and location including home office
